

Building Northeast Wisconsin IT Talent Pipeline Analysis and Recommendations

Oshkosh June 23, 2015

Acknowledgement

- The Market Analysis Project was lead by Northeast Wisconsin Educational Resource Alliance (NEW ERA), the consortium of higher education institutions in northeast Wisconsin, with the support of Workforce Development Boards, Chambers of Commerce, Economic Development Organizations, and private industry in the region.
- Mike Mathews, President, Economic Growth Advisors developed and implemented the research model.

Agenda

- Project Objectives and Sponsorship
- Study Approach and Participation
- Executive Summary
- Recommendations

Project Objective and Sponsorship

NEW ERA IT Market Assessment Area

Objective

Develop prioritized set of coordinated, market informed recommendations to guide decision making and investments that advance the growth and development of information technology jobs and firms in the New North region.

Bridge Regional IT Skills Gap

- Age
- Geography
- Interest
- Ability

Candidates

Value Added Employees

- Time
- Expenses
- Access

- Current need
- Future need
- Competition

Study Approach and Participation

Data Collection

Primary Data Inputs: Employer Interviews and Surveys

Demand (Current) Demand (Current)

GAP

Supply (Current)

Supply (Current)

Demand (Future)

Demand (Future)

Supply (Future)

Supply (Future)

Secondary Data Inputs

Secondary Data Inputs

Direct Inputs

- Input from more than 40 employers representing:
 - More than 108,000 employees
 - More than 3,650 IT employees (3.4%)
- Round table meeting sessions (10); Fond du Lac (2), Green Bay (2), Oshkosh (2), Fox Cities (2), Sheboygan (1) and Manitowoc (1)
- More than 75 employer representatives and 15 workforce and economic development representatives
- Collection and compilation of surveys and secondary data sources for both supply and demand
 - IT Professionals located in northeast Wisconsin
 - IT Career Pathway Selection 8th grade/high school in 93 school districts
 - Technology educators, K-12, in 93 school districts
 - Public and private colleges and university programs in northeast
 Wisconsin

General Observations

- Very diverse set of audiences and potential impacts
- General lack of employer recognition regarding how prevalent challenge is to hire appropriate IT talent within the region
- General lack of awareness regarding current regional initiatives to address current and future needs
- Relatively high level of interest in regional collaboration
- Appreciation for effort to address employers 'concerns and pursue regional opportunities

Executive Summary

Northeast Wisconsin IT Jobs

- There were approximately 10,121 people employed in IT jobs in NEW in 2010
- NEW IT jobs total approximately 14.5% of the IT jobs in the State (69,566)
- ▶ There is strong potential and projected 10 year growth for IT jobs in the NEW region; 2,131 net new jobs out of 8,167 Statewide; more than 26% of the growth in the State.
- NEW region IT jobs are projected to grow at a **faster rate** than Wisconsin as a whole (21% vs. 11.7% over a ten year period)

IT Demand Curve

- There is a current, and growing gap between supply and demand for IT talent in Northeast Wisconsin
- Accelerating quantitative and qualitative demand for IT talent within the region
- The IT talent gap has had negative competitive effects on NEW employers including costly recruiting, delays in new products and services, and high turnover rates

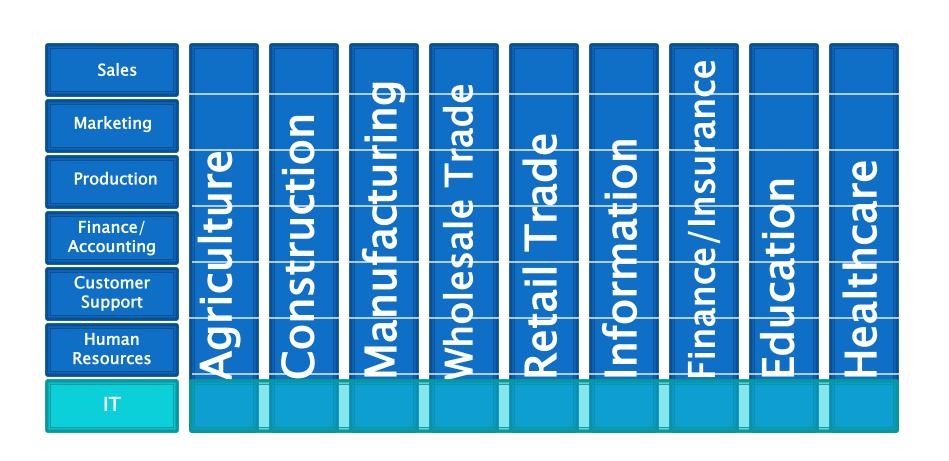

Costs of IT Talent Gap

• Given that NEW is approximately 15% of the IT jobs in the State, and is expected to account for more than 25% of the new IT jobs in Wisconsin

Estimated Job Shortfall X IT Median Wage = Cost to Region

	2012	2016	2021
State	780	5,200	11,600
14.5%	113	750	1,680
25%	195	1,300	2,900
\$70,000	\$13,650,000	\$91,000,000	\$203,000,000

Talent Demand

- ▶ Employers report 4 year college degrees and credentials are preferred to meet business demands; however, employers realize that more associate degreed individuals and certificate awardees will be needed to meet demand.
- Employer consensus that there are not enough college graduates (associate/bachelor/master degrees) within the region to meet current and projected IT workforce needs
- Influx of talent is needed, but employers cite substantial competitive obstacles to attracting IT professionals to the region including location, wages, perceptions of opportunities
- The region needs to address key strategic areas to be effective in the recruitment, development and retention of IT professionals

Good News - Regional Assets in Place

- The gap in Northeast Wisconsin is not as severe as in other areas of the U.S.
- Existing educational resources and capacity to address the IT needs of the region in terms of both quality and quantity
- Large regional pool of potential IT candidates who have traits and abilities employers are in need of, but need additional training and education to provide immediate value in these positions
- Opportunities to parallel global companies efforts (Google, Microsoft, Facebook, etc.) and regional efforts (Women in Technology, Amplify Oshkosh, Tech Savvy, etc.) to attract greater numbers of women into IT careers.

Different Approach to Solutions

- Addressing IT talent solutions requires different approaches than those that address other industries (i.e. manufacturing) or occupations (i.e. nursing)
- Although IT positions are widespread, addressing these needs requires more than a shot gun approach; efforts need to be targeted (time intensive)
- There is no one "silver bullet" solution; there are many things that need to happen in a coordinated manner, acknowledging and addressing the particulars of the region
- IT professions are not highly concentrated in a small number of industries; professions are widespread across all industries

Collaboration and Cooperation

- Employers were asked, "What is one big thing we can do in the next 12 months?" The answer was overwhelmingly collaborate and cooperate on solutions that market the region as tech savvy and attracts and keeps the next generation talent.
- Through a collaborative approach, regional companies can grow, residents can be employed in high demand, high wage professions, and communities and the region benefit from the dynamic economic growth cycle
- Regional employers acknowledge need for regional public /private sector effort - situation requires more than any one employer can address effectively

Recommendation Categories

- Input of regional employers (interviews, round tables, surveys), and analysis of data sources, has led to market informed recommendations including:
 - Organization and Advocacy
 - Marketing and Branding
 - Education and Training among Target IT Candidates

Organization

Organization Framework

Advocacy

Education and

Tra<mark>in</mark>ing _____

Targeting

Marketing and Branding

Organization

Organization- IT Alliance

- Mission: Regional, non-profit to develop, coordinate, prioritize, fund and advocate for the implementation of regional strategies designed to provide employment growth in IT careers.
- Benefit: Collaborative approach benefits regional companies on attracting, developing and retaining IT talent, regional residents can be employed in new growing, high wage careers, and communities benefit from economic vitality.

Advocacy

Current Initiatives

Local

- Amplify Oshkosh
- FVTC's GirlTech
- Talent Upload
- Young Professionals
- Hackathon
- Hour of Code
- Einstein Project
- College Avenue 212
- IT college student clubs
- Maker Space in Green Bay

Regional

- IT/Software Developer Group
- Women in Technology
- Tech Savvy
- Angels on the Water
- CIO Tech
- Software Developer Peer Groups
- IT Innovation Academy
- Aero Innovate
- Emergent Tech Center

Advocacy

- Purpose: Regional forums to share experiences, best practices, and identify and develop opportunities for the replication of successful local strategies across the region.
- **Benefit: There are many successful efforts underway across the region.** Some are unique to a particular area, but many are creating approaches and generating dynamics that can be scaled across the region.
 - Amplify Oshkosh
 - Emergent Technology Center in Fond du Lac
 - IT Innovation Academy for high school students
 - Women In Technology
 - FVTC's GirlTech
 - Tech Savvy
 - Talent Upload
 - Growth and efficiencies to support participation and resources for local and regional efforts.

Regional Marketing and Branding

NEW Employer Survey Response

What do you believe are the factors contributing to the IT talent shortage?

- Lack of understanding of IT job opportunities and salaries (95%)
- Lack of interest from high school graduates (90%)
- Perceptions of IT jobs (76%)
- Northeast Wisconsin location (75%)

NEW Employer Survey Response

What is one "big idea" that we should pursue in the next 12 months to build and sustain IT talent in the region?

- Collaborative marketing effort"
- "Create an education/awareness campaign where area employers can more closely engage college students or other IT professionals"
- "Advertise and drive high school and college students toward IT related degrees"
- "Collaborative branding of the Fox Valley area as a "high tech" area ... branding both to the current community members (i.e. high schools/parents) as well as to those outside the region

Marketing and Branding

- Purpose: To develop, manage and deliver a consistent message and theme to raise awareness, recognition, interest and excitement about IT careers. Key audiences:
 - College students, high school students, non- IT college graduates
 - Returning veterans, disabled workers
 - Non-residents of the region, and boomerangs (those who grew up in the region and would like to return).
- Benefit: Employers were in agreement about the quantity of candidates was due to the lack of interest, understanding and preconceived ideas of what IT careers and professions are like. Many employers stated the region has a compelling story to share about the employers, employees, jobs and activities in the region today.

Education and Training

NEW ERA IT College Students

- Fox Valley Technical College,
- Lakeshore Technical College,
- Moraine Park Technical College,
- Northeast Wisconsin Technical College
 - 19 Programs of Study in IT (2012-14)

 Graduates: Associate degrees awarded to 300 students per academic year (80% male)

Associate Degree Graduates (2013-14)*

Associate Degree	Male	Female	Total Graduates
IT Network Specialist	84	5	89
Computer Support Specialist	41	16	57

^{*}Career Cruising Database – 5,162 students in 12th grade in northeast Wisconsin school districts, 2015

Current Employer Engagement

- Rank order of engagement with IT talent pipeline:
 - IT incumbents within the region (79%)
 - Universities (68%)
 - Technical Colleges (68%)
 - Returning Veterans (39%)
 - Disabled Workers (39%)
 - High Schools (33%)
 - IT recruits from outside the region (32%)
 - Middle Schools (22%)
 - Returning Adults (16%)

NEW Employer Responses on Education and Training

- "There is an insufficient number of annual graduates within the region to meet our needs."
- "This is not a quality issue. It is a quantity issue."
- A number of employers are using internships as a means of building bridges to connect with candidates on the path to job readiness.

IT Target Candidates

Targeting

- Computing jobs are available for workers at all levels of educational achievement.
- A small percentage 6% of computing professionals hold only a high school diploma or GED, and one percent have not graduated from high school.
- About a third, 29% of computing professionals have some college experience, a certificate typically requiring one year of study, or an associate degree, typically requiring two years of study.
- Most computing professionals, about two thirds, have a bachelor's degree or higher; 44% hold a bachelor's degree, 18% hold a Masters degree, and 2% hold a doctorate.

(AAUW analysis of U.S. Census Bureau, 2011).

Broaden IT Talent Pool Within the Region

Source: NEW Employer Survey

Education and Training of IT Candidates

- Purpose: Collaborate and coordinate with employers to build interest in existing IT programs of study and offer new collaborative degree programs in emerging, high demand IT professions. Potential for credentialing programs through colleges and universities to deliver industry recognized certificates or credentialing programs in areas of high demand IT professions. Requests were made for such programs as user groups of ERP/SAP systems, and resources in cyber security, and data science analytics.
- Benefit: There are many qualified, but un-credentialed, candidates within the region that will require direction, additional training and education, and assistance in finding the right path for them in terms of job interests and opportunities. The large majority of these candidates are already located in NEW and are part of the regional economy.

Example: 2+2 in Development

Why 2 + 2 Program?

- NEW employers demand for students with software development skills and business systems knowledge.
- Student flexibility to work full time, as credentialed software developer and continue toward a Bachelor degree.
- Affordability with potential employer tuition reimbursement.
- More students in the IT career track.

NEW Digital Transformation.....

- Collaboration and cooperation that builds awareness, interest and advancement of IT professionals.
- Regional marketing and branding to attract, develop, and retain IT talent.
- Education and training to develop the skills and talent of emerging and current IT professionals.
- Advocacy from communities, businesses, and IT professionals to collectively leverage resources and make northeast Wisconsin a leader in IT.

THANK YOU!
