

FOR IMMEDIATE RELEASE

NewView Technologies, Inc. Announces Ownership Transition to Bryan and Nicki Langfeldt Founders Bruce and Rae Botterman pass the torch after 30 years; Bruce Botterman to remain actively involved during the transition

Oshkosh, Wis. — May 11, 2025

NewView Technologies, Inc. today announced that Bryan and Nicki Langfeldt have acquired ownership of the company from founders Bruce and Rae Botterman, effective immediately. This transition closes a 30-year chapter under the Bottermans' leadership and begins a new era with owners committed to building on that strong foundation.

Bruce Botterman, who co-founded NewView Technologies with his wife Rae, will remain actively involved, ensuring continuity of leadership and customer relationships during the transition period.

“We are grateful beyond words for what Bruce and Rae built here. The trust they placed in us, and the trust customers have placed in this company for three decades, is something we take seriously. Our job now is to earn it every day.”

— Bryan and Nicki Langfeldt, incoming owners, NewView Technologies, Inc.

“Rae and I are proud of what this company has become, and we couldn't be more confident in Bryan and Nicki as the people to carry it forward. This is the right move for our customers, our team, and the future of NewView.”

— Bruce Botterman, co-founder, NewView Technologies, Inc.

The Langfeldts bring over 15 years of experience in the aviation industry, including the past five years working with NewView Technologies in the Fox Valley. They are committed to maintaining the trusted customer relationships and high service standards that have defined the company since its founding.

Continuity for Customers, Partners, and Vendors

Customers, partners, and vendors can expect uninterrupted service and direct communication from the new ownership team during the transition.

About NewView Technologies' Services

NewView Technologies is one of only a few companies nationwide with a certified repair station for aircraft windows. The company has a long-standing relationship with Gulfstream Aerospace and has serviced windows on a wide range of aircraft, including:

- Business jets: Dassault Falcon, Learjet, Bombardier, and Cessna
- General aviation aircraft: Piper, Cessna, Mooney, Beechcraft, and others

In addition, NewView Technologies specializes in avionics installation and troubleshooting, offering solutions from single radios to full panel retrofits. The company works with top manufacturers, including PS Engineering, L3, and Electronics International, and maintains dealer agreements with Garmin International, Dynon, and Appareo.

About NewView Technologies, Inc.

Founded in 1995 by Bruce and Rae Botterman, NewView Technologies, Inc. is an Oshkosh- and Appleton-based provider of aircraft maintenance, avionics installation, and window repair services. For 30 years, the company has served customers across the aviation community, with a focus on single-engine and light-twin piston general aviation aircraft.
